HOLISTIC IT SOLUTIONS FOR YOUR PRACTICE

SYSTEM ESTABLISHMENT

We build entire systems, from hardware to cloud. Our hardware and software are from trustworthy brands that you can rely on.

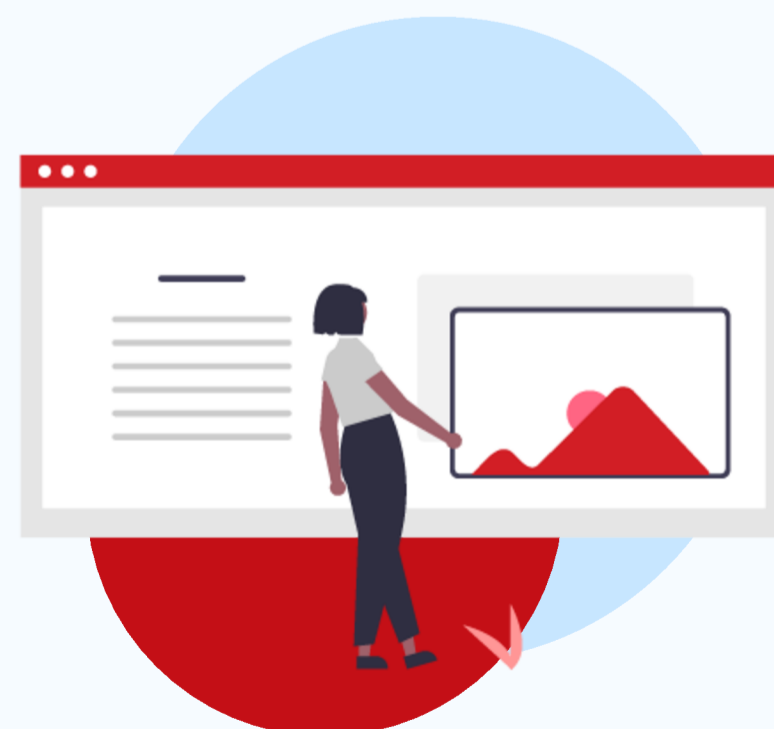

UPGRADE YOUR PRACTICE

Whether you're needing to upgrade your existing practice or start up a new one, we've got you covered. Our professional team at Medi IT takes the best care of all your technological challenges, so that you can provide the best care for your patients.

FULLY INTEGRATED

Integration ensures smooth communication of data between services that will ensure efficiency and performance of your practice.

WEB & GRAPHIC DESIGN

Have a website that stands out and compliments your brand and practice. We also offer graphic design services for any kind of digital or print media.

Cybersecurity & Data Protection

Medi IT provides enterprise-grade Endpoint Protection, EDR monitoring, secure backups, and proactive cybersecurity management to protect your practice from modern cyber threats.

Cybersecurity is a shared responsibility. Our technology, combined with staff awareness and best practices, helps safeguard sensitive patient information and maintain compliance with Australian privacy regulations.

YOUR PREFERENCE IS OUR PRIORITY

Whether you are an existing brick and mortar practice, a startup online practice, or somewhere in between, we can make it happen. Our systems are completely tailored to your preferences, offering secure & reliable solutions.
